1)Introduction about the role

We created a Management Information System for Faculty of Technology as our OOD mini project. There are four main users in this system. They can do several functionalities using this system. My task is creating student interfaces and doing some functions. I create several classes to develop this system.

2)Functionalities of The role

- Can update only contact details and profile picture of their profile

- Can see attendance details

- Can see medical details

- Can see their course details

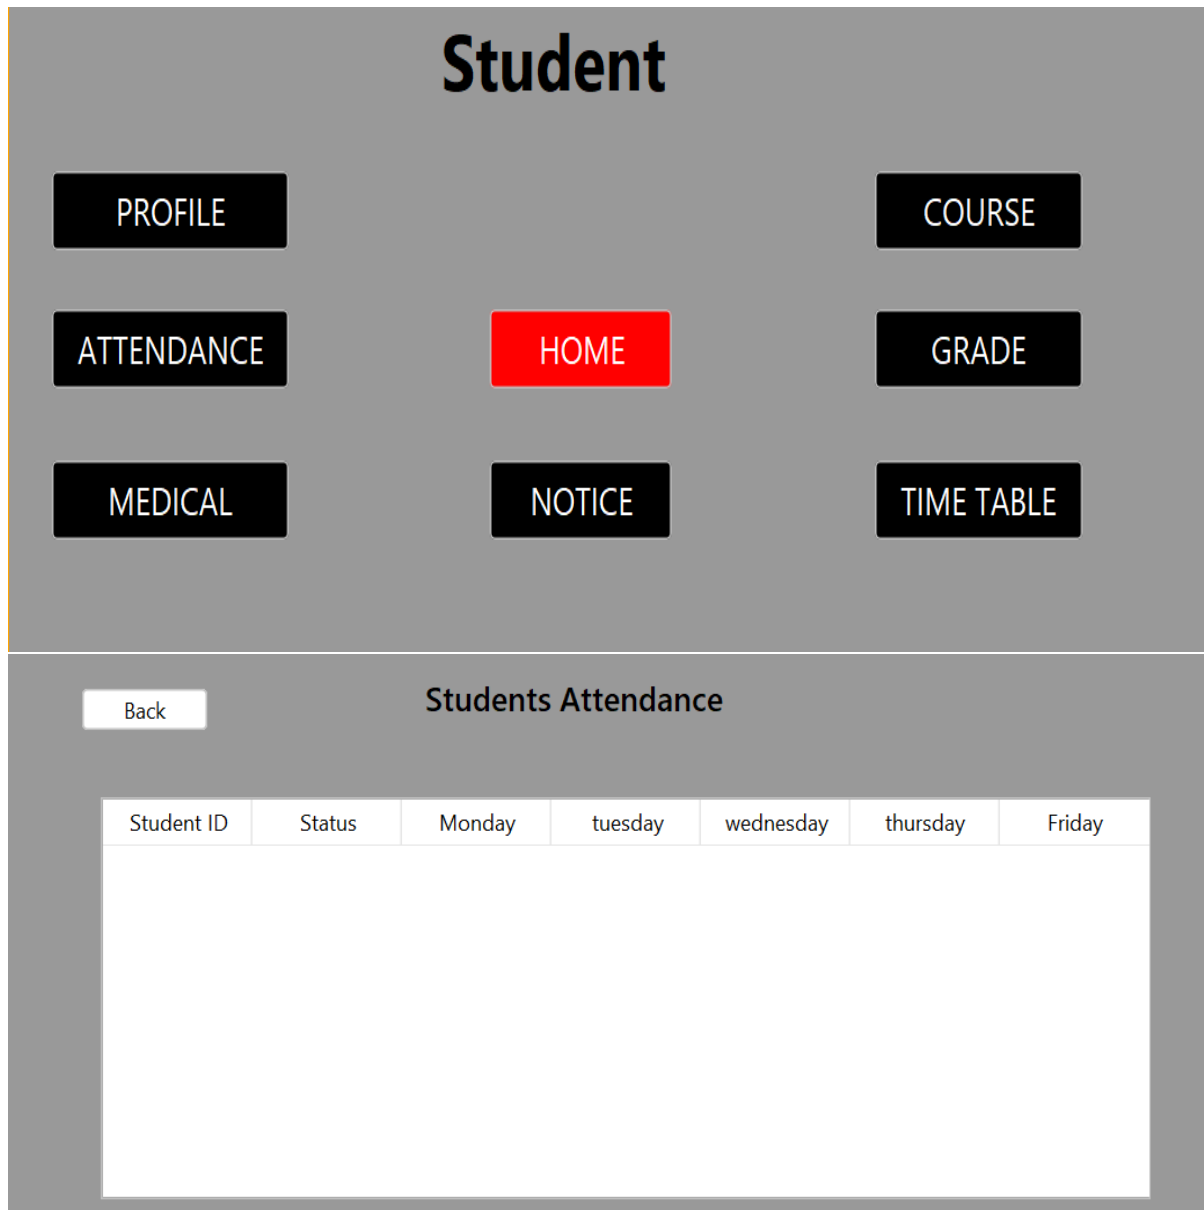

- Can see their grades and GPA

- Can see their timetables

- Can see notices

3) Evidence for Completed Tasks

Time Table

Time	Sunday	Monday	Wednesday	Thursday	Friday

4) Used Tools and Technologies

- NetBeans IDE 13
- phpMyAdmin

5) Problems encountered during the development of mini project

- Inadequate Funding is most likely to affect projects with changing requirements.
- everybody informed on the project status at all times. Lack of efficient communication will lead to errors and delay
- We created ER and class diagram but when developing some differences were occurred

6) Solutions and How to overcome the above problems

- I change my functions according to ER diagram and class diagram
- To correct my calculations, I have to add some functions.
- Measure the Results in our project
- I change my functions according to ER diagram and class diagram
